

Transguard **K9 TEAM**

For everything Transguard

visit www.transguardgroup.com or call us at 800 1800

Introduction:

Launched in 2016, Transguard's K9 unit works together with US-based MSA Security, the largest provider of Explosive Detection Canines (EDC) in the United States. We work closely with MSA to ensure our K9 team receives world-class sporting breeds with a keen sense of smell, strong drive, intelligence, stable temperament, and eagerness to please.

We provide high quality K9 teams to the Aviation industry, with units operating 24/7 to ensure the safety and security of cargo arriving at and departing from Dubai (DXB) and Dubai World Central (DWC) airports.

In addition to monthly reports, our clients also receive K9 training records and K9 work logs, as well as access to our highly experienced K9 manager and trainer, both of whom ensure quality control and quick response times.

With over 850 company-owned canines and certified EDC teams deployed globally, MSA ensures that all their EDC are imprinted and are trained on all current and emerging explosive threats.

Our K9 handlers:

- All our handlers have a minimum of three years' K9 experience with either the military, police, corrections or customs departments, as well as experience working K9s in austere environments such as Afghanistan, Iraq and South Sudan.
- Transguard prides itself on the consistency of its K9 Team, as most of our handlers and K9s have been a part of our operations for three to six years.
- To increase diversity and experience within the team, we actively encourage applications from qualified female K9 handlers.

What we provide:

Searches

- Events
- Vehicles (entry and exit)
- Hotels

Training & Consultancy

- Project management and K9 training assistance of any existing or new K9 units
- K9 consultancy for K9 training
- K9 Quality Assurance/Quality Control (QA/QC) programmes
- K9 operations, including use and advice for potential and existing clients

Procurement

- Green (untrained) K9s and fully trained K9s for all disciplines from quality K9 providers
- Procurement and delivery of K9 food
- Procurement and delivery of all K9 training equipment

Looking after our K9s

- Our K9s are housed in fully air-conditioned kennels at our main facility in Dubai
- They are transported in dedicated and specialised vehicles, which are equipped with additional air conditioning
- All Transguard K9s have access to internationally approved veterinary cover 24x7
- We feed our K9s Royal Canin, a high quality, internationally recognised brand
- We store dog food in air-conditioned spaces to limit the possibility of Aflatoxin

Training our K9s

- We use Operant Conditioning training for our K9s, which is less stressful on the K9, gives a better response and enhances the cooperation between the handler and his/her assigned K9
- We always ensure the sterility of our K9 training aids, as this is important to reduce the chance of false indications by the K9
- Kong/toy tolerance is trained; this ensures K9 handlers can train more efficiently and effectively
